Note:

- 1) A Die Cut variety is 'Embedded' when at least one full Peak is on Top or at the Bottom. The position can vary from Top to Bottom.
- 2) Vertical Coil. Die cuts run horizontally. See note on page 7.

All Die Cut varieties are possible on the listed stamps. They will all depend on their first being a die-cut error and then that error being found. The errors marked with X are known or it can be assumed with certainty that they exist. Others will be added when find to exist. Please let me know when you find a new Die Cut variety.
