

USA Specialized Checklist

Postal Counterfeits 1998-Present

USA Checklist Postal Counterfeits

This checklist only indicates the amount of Counterfeits discovered per issue. To classify a counterfeit found as a specific type, there are comparison lists with detailed images for each issue are available at www.usca.nl

Here are some basic steps to take to distinguish the Genuine from Counterfeits.

How to check Genuine vs. Counterfeit

1. Tagging

Check the stamp with Short Wave Ultra Violet light (SWUV) for tagging. Most counterfeits made before 2022 lack tagging. From 2022 printed counterfeits (also older issues) do have tagging, but the taggant is brighter under SWUV than the genuine. There are also CF Issues that glows under SWUV **and** LWUV.

2. Surface by daylight

Check the surface in daylight or under white light. Some counterfeits differ markedly in gloss or color.

3. Paper type

Most genuine stamps are printed on Off-white paper. Counterfeits often on White paper. Check with Long Wave Ultra Violet light (LWUV) the paper type of the stamp, Backing Paper or booklet. Many counterfeits differs the brightness (Paper fluorescence) in Dead Paper, Low Bright or Hi-brite paper.

4. Printing differences

Check the details with most noticeable differences. These are:

- **Die cut:** The difference in Die cut can sometimes be clearly seen with the naked eye, but with the most recent counterfeits the Die cut is very accurate and sometimes only a tenth of a millimeter difference. With Genuine issues the perforation is even and with the Counterfeits mostly uneven. Also beware of a possible difference between Peak-Valley and Valley-peak.
- **Date:** The year number is a remarkable difference for most issues. Pay close attention to the font, color and printing.
- **Microprinting:** The microprinting USPS is one of the main features to recognize a Counterfeit. In many cases the microprint is missing or illegible. And if it is legible, the fonts and size will be different. A number of coil stamps even have double microprinting on two positions.
- **Printing:** In general, there is a clear difference in the way the printing ink is applied. The Counterfeits are often printed more coarsely. The direction in which a waffle pattern is printed can also indicate which counterfeit it is.
- **Backing paper or Booklet cover:** The print on the backing paper or on a booklet cover can also serve as a comparison to be sure whether or not it is a counterfeit. For example: An error in the text, a different font, the pattern of the plate position or a different barcode.
- **Plate number:** The difference in the font of the plate number is generally not immediately noticeable, but it can be seen. Often the difference is in the thickness of the font or the way in which a serif is applied to the top of a "1". Most Counterfeit Coils do not have a plate number.

PS. If you have counterfeits to add or something to correct please let me know: Hvg1958@hotmail.nl
